SKILLS

- ReactJs, Next, SpringBoot, Tailwind, Bootstrap, Docker, Prisma, AWS, Azure
- Javascript, Typescript, Java, SQL, NoSQL
- Troubleshooting, Debugging, Team Building, Leadership, Emergency Handling

WORK EXPERIENCE

Freelancing: *Full Stack Developer*   [December '24 – present]

- Developed a secure and scalable mutual funds management platform for the client.
- Designed intuitive dashboards for portfolio tracking, risk analysis, and investment insights.
- Integrated secure APIs, data encryption, and financial compliance features.
- Ensured optimal performance and code quality through effective testing and clean code practices.

The Sparkles Play School: *Operations Manager*   [January '23 – December '24]

- Produced SOPs to document workplace procedures and optimize productivity through standardization.
- Delegated work to staff, provided guidance and training to the staff for better management.
- Improved morale and management communication by creating employee recognition and rewards practices.

Infosys Limited: *Specialist Programmer*   [August '21 – January'23]

- Designed and developed a comprehensive policy management solution for the client from scratch.
- Integrated a payment gateway to facilitate paperless transactions, and enable seamless updates to policies, vehicles, and more directly through the portal.
- Gained expertise in clean code architecture, implemented complex business features using Angular, and ensured robust functionality by creating unit tests for all features, with over 80% code coverage.

PROJECTS

Book Social Network: *[Source Code]*   [Spring boot, Angular, Bootstrap, Postgres]
Its is a platform that allows users to rent their books to others and borrow books from fellow users. Users can post their own books, search other books, rent them, and can also rate the books.

Multiplayer Chess Game: *[Source Code]*   [React, Tailwind, NodeJs]
The application enables players to connect with random opponents and play chess in real-time. Key features include an intuitive interface, move tracking, and seamless matchmaking.

Algorithm Visualizer: *[Source Code | Live Link]*   [React, Bootstrap]
An interactive tool designed to help users understand and visualize various sorting algorithms in real-time.

Expense Tracker: *[Source Code]*   [React, Bootstrap]
An intuitive and user-friendly expense tracker application designed to help you manage your finances efficiently.

Tic-Tac-Toe Game: *[Source Code | Live Link]*   [React, Bootstrap]
Tic-Tac-Toe is a simple two-player game where the objective is to get three of your marks in a row. Players can update their names, check the game history, and see who is winning.
